PIXLR Assignment Checklist

1. First, you will need to think <u>plan</u> out what you want your image to look like. This will help guide your web search.
2. Use a <u>search engine</u> to search up images. Remember Mr. Swan's demo; search for images that are larger than 800 pixels high and wide. You can <u>resize</u> them in PIXLR later.
3. Search, download and save at least three separate images to use for your file.
4. Import your three separate images into PIXLR as <u>three different layers</u> and then you may begin creating your design.
5. <u>Arrange your layers</u> as necessary to make the design you planned out in step one.
6. Make sure to experiment with the following tools. You may use more; however, you need to use all the following tools:
   a. Lasso Tool
   b. Move Tool
   c. Eraser Tool
   d. Free Transform Tool
   e. Text Tool
   f. Image Size Tool
7. <u>Save</u> your file as a PXD (firstname.lastname_pixlr.pxd) file and then upload your file to <u>CTLS</u>.
